```cpp
#include<iostream>
using namespace std;
int main()
{
        string a,b;
cout<<"ENTER THE STRING =>";
cin>>a;
        for(int i=a.size()-1;i>=0;i--)
        {
                b+=a[i];
        }
        if(a==b)
        cout<<"THE ENTERED WORD IS PALINDROME....";
        else
        cout<<"THE ENTERED WORD IS NOT A PALINDROME...!!!";
}
```
